CONV-WCOM 1-1:

For the routes specified below, please indicate if WorldCom has deployed its own dark fiber dedicated transport, which may include dark fiber facilities that you have obtained on a long-term indefeasible - right of use (IRU) basis. To count as self-provisioned dark fiber you must have deployed dark fiber "along a given route between incumbent LEC switches or wire centers," the dark fiber must be "operationally ready to provide transport into or out of an ILEC central office," and such dark fiber must terminate at a collocation arrangement at each end of the transport route that is located at an incumbent LEC premises and in a similar arrangement at each end of the transport route that is not located at an incumbent LEC premises.

Only limited quantities of dark fiber are terminated to the collocation arrangements at the above wire centers in order to meet MCI’s reasonably anticipated demand for capacity.

CONV-WCOM 1-2:

Has WorldCom deployed its own dark fiber, including dark fiber that you have obtained from an entity other than the incumbent LEC, for any of the routes specified below and is WorldCom operationally ready to lease or sell those facilities at wholesale? In order to answer affirmatively, you must be willing immediately to provide, on a widely available basis, dark fiber along the particular route between ILEC switches or wire centers. To answer affirmatively, the dark fiber must terminate in a collocation arrangement at each end of the transport route that is located at an incumbent LEC premises and in a similar arrangement at each end of the transport route that is not located at an incumbent LEC premises. If you do offer dark fiber dedicated transport at wholesale over your own facilities for any of these routes, please indicate the rates for such dark fiber dedicated transport.

MCI Response:

MCI has no generally available wholesale dark fiber offering.
